SoundPool start Inside the first call to start() method, this code loads a file and creates the SurfaceView and SurfaceHolder: // we create the viewholder that will hold the texture viewHolder = new ViewHolder(); // we create the listener to release the // resources when the surfaceview is released surfaceHolder.addCallback(this);

```
SurfaceTexture.OnSizeChangeListener sizeChanged = new SurfaceTextureOnSizeChangeListener(surfaceHolder) {  
@Override public void onSurfaceTextureSizeChanged(SurfaceTexture surface, int width, int height) { // resize the texture, and  
reset the frame to fit the new size mTexWidth = width; mTexHeight = height; mStartScaleX = mStartScaleY = (float)  
Math.ceil( (double) mTexWidth / (double) mTexHeight ); mSource = new Surface(context, width, height); mSrcWidth =  
mSrcHeight = 0; } };

Download. Or should I try and eliminate all
files (I'm just guessing) and see if the keygen
works? Will go with #1 now. CRACK
