FSX - Aerosoft Innsbruck LOWI Airport V1.10.Q: Rails 3.0.3 remote asset precompilation I'm trying to set up a pre-compilation that runs in development but is not run in production. I have a post action and a user action that are different assets. In development the assets are served by the asset_host. In production the assets are served by Apache. So I want to be able to compile these assets on user request and then have them be pre-compiled before serving them from Apache. I tried using Rake tasks to precompile each asset. The task does nothing, not even compiling the asset. I tried changing it to precompile 2d92cc491b
