The process of creating a personal mix of a song, recording, or audio clip has never been so simple and intuitive as it is with ADX. ADX is as easy to use as a Mix Pad on your computer and enables its user to create a beautiful personal mix in just minutes. ADX is as easy to use as a Mix Pad on your computer. Rediscover your songs and then mix them with superb audio separation. ADX automatically finds the best mono track in a song. In combination with audio separation, ADX results in unique personal mixes. Create fresh mixes with audio separation. ADX is the most important audio separation software on the market today. Available in different versions for desktop and as an online service, it is designed to provide all of the best tools for audio separation. Innovative audio separation technology that you can quickly use. ADX™ is an exciting and intuitive audio separation tool. It makes it possible to remove the original vocals from a song and produce a "dry" version. These separated vocals can then be mixed with other songs, as well as with instrumental music. The result? A unique mix of your original song with new, original songs or popular music. ADX™ is the only audio separation technology that comes with a free version. The free version provides you with everything you need to create unique mixes, but it will not include any premium features. The premium version offers much more than the free version and is recommended if you want to create exclusive mixes. There are many different ways of introducing vocals into a mix. You can remove them completely and let them play, or you can just use them to create a new mix. The fact is that audio separation technology will not do the job for you. You will need to mix the results with your own creative ideas and skills. There are different ways of introducing vocals into a mix. You can

remove them completely and let them play, or you can just use them to create a new mix. The fact is that audio separation technology will not do the job for you. You will need to mix the results with your own creative ideas and skills. When it comes to most modern sound systems, a high level of control over volume, bass and midrange is a necessary feature. The same applies to CD players. Without high quality hardware, it is a waste of time to mess around with software. The second reason why professional audio separation software is an absolute necessity
