Let V and U be K -vector spaces and $f: V \rightarrow U$ be a K -linear map, where K is a field. Show that: $\langle v, u \rangle = 0 \iff \langle f(v), u \rangle = 0$ If $f(v) = 0$, then $\langle v, u \rangle = 0 \iff \langle f(v), u \rangle = 0$ If $\langle v, u \rangle = 0$, then $\langle v, u \rangle = 0 \iff \langle f(v), u \rangle = 0$ A: v and u are vectors of V and U respectively, so you have the inner product $\langle \cdot, \cdot \rangle : V \times U \rightarrow \mathbb{K}$ and $v \cdot u$ is the inner product of v and u 2d92ce491b
