get auto clicker and macro recorder to use automated mouse clicker on winamp 11 I am having a problem with the stick of the mouse, it randomly clicks on its own, I suspect it is hardware or software problem, since my main mouse is working fine, if I plug it into a port that is not used by the mouse, it does not click I use Windows 7 32 bit, my mouse is Logitech G502 Optical Mouse A: Thanks for the comments, now I see that my mouse is called xbox 360, it seems it has some problem on that. I changed the mouse and it works fine. A: The problem was caused by the possibility to enable double click to open files in Windows Explorer. Aug 12, 2009 Opinion: To house the pipeline in the US or not As the debate about the proposed Keystone XL tar sands pipeline picks up speed, I have been reading a bunch of articles on the subject. I have to say that I am on the fence. On one hand, I am 100 percent opposed to the tar sands, its production and its pipeline to the US. On the other hand, I am 100 percent opposed to shutting down and condemning an entire industry in America just because some people (mostly from Canada) are willing to spend some money to “fight” the project. The President and his administration have been trying to balance the need for jobs versus the need to reduce our dependence on foreign oil and limit greenhouse gases, which are the leading cause of climate change. They have put the most pressure on Canada, because we are not a member of the Kyoto Treaty, which limits the amount of greenhouse gases in the atmosphere. After all of the hearings and the debates in the Senate, the President has to make the decision. The House of Representatives voted 296 to 100 to approve the tar sands pipeline, but in the Senate the vote was 55 to 44 against the bill. In his post-election, pre-inauguration speech, President Obama said that he wants to create energy jobs in America, but since it is only a symbolic effort, the American people don't care. While it is clear that the people in the USA want to reduce the amount of pollution in the atmosphere, they are not terribly interested in looking into the real reason for that pollution, which is climate change, brought about by the burning of fossil fuels like
