The resolution, sponsored by State Representative Eric Burlison, R-Springfield, would have prohibited police officers from carrying firearms with magazines, also known as magazines, that accept more than 10 rounds of ammunition. According to Roll Call, the bill sailed through a House committee and a full house vote as well, but was removed from consideration by a State Senator just before the Senate vote. On the floor of the House, Rep. Burlison cited the shooting in Madison, Wisconsin, that killed an officer and injured three others as the reason for his bill. "Many lawmakers have been quick to call for more gun control," said Burlison in his statement. "In fact, there was a lot of discussion and movement on gun control in the 90's. I was supportive of it then, and I'm still supportive of it now. However, I think we should look at other parts of that conversation, not just gun control. "One of the things we should look at is the Second Amendment and the magazine capacity," he continued. "I'm not saying that the gun control conversation is over. I just want to look at other things that have to happen that need to take place." The resolution was defeated by a vote of 86 to 48. Childhood obesity is associated with significant health risks, including type 2 diabetes, cardiovascular disease, hypertension, stroke, and certain cancers. Obesity prevention occurs through public health efforts to decrease consumption of unhealthy foods and increase physical activity through policy and community change. This review focuses on the limitations of current obesity prevention efforts and possible ways to bridge the prevention-treatment gap in childhood obesity. Barriers to preventing and treating obesity include a lack of knowledge of the disease process and treatment options, family conflicts, a lack of provider awareness of childhood obesity, the lack of a national action plan to prevent and treat childhood obesity, and the lack of a national childhood obesity policy. Awareness efforts to promote the prevention and treatment of obesity in the United States have increased among families, providers, and policy makers. However, most efforts focus on childhood obesity. ba244e880a
