◀PAGE◀ You're a music fan and you just bought a bunch of your favorite artists albums. What would you do with them? Keep them where they are of course and listen to them whenever you want to. Unfortunately, as soon as you're done listening to them, you'll have to re-buy them every time you want to listen to them again. With MarkAble you can synchronize your iTunes Music library with an iPhone, iPod or iPad and listen to your albums whenever you want without having to re-buy them. You can also import audio files, podcasts or even burn them to an audio CD on your device. A lot has changed since the introduction of the iPod and now you have a whole bunch of other devices to keep in touch with. What would you do with them? Obviously, you'll want to have access to them wherever you are. With iTunes you can easily access your music or podcast collection from anywhere in the world. No matter where you are, you can listen to your tracks on the go on your iPod or iPhone, iPad or any other iOS device. However, accessing those music files can be a pain. Especially when you're out and about and you'd like to have access to your whole library without having to transfer all of them individually. Well, from now on you can access your content wherever you are with the help of MarkAble.
