Introduced in 2015, it is the result of an agreement between MasterCard, Visa, and the card networks, providing guidance to issuers and acquirers about the minimum security, authentication and risk management requirements of EMV cards. As a result of the card brands' agreement, financial institutions can legally issue EMV cards to customers who decline chip cards, because existing magnetic stripe cards will still function without them. The policy has been implemented by state-by-state, with final plans for implementation being announced in 2016. The adoption of EMV started in the US in October 2015. Background The EMV standard was first released in 1998, with the intent to replace magnetic stripe cards with contactless cards at merchant terminals in Europe. In 1999, the two largest card networks, Visa and MasterCard, agreed to implement EMV in the US. On July 20, 2015, the card networks announced a new global EMV standard for card payments. The new standard, designed to replace magnetic stripe technology, will be developed and implemented through a public-private partnership between Visa and MasterCard. The companies will set a minimum security protocol for the EMV cards and the acquiring banks and merchants will have a year to upgrade their systems. Cardholders will have the option to decline to use EMV cards. The next day, on July 21, the
