Programming environments The AutoCAD Architecture and Electrical products use Visual LISP as a scripting language. AutoCAD XE also supports Visual LISP. AutoCAD's VBA add-on uses Visual Basic for Applications (VBA) scripting and VBA is an integral part of AutoCAD, as AutoCAD's native application programming interface (API). AutoCAD's .NET add-on uses Microsoft Visual Studio to compile Microsoft Visual C#.NET scripting as a component, and the compiled component is the AutoCAD.NET add-on. AutoCAD also supports ObjectARX, which is a C++ class library for programmable extensions. The ObjectARX component can be used to create AutoCAD extensions that can be installed and used in AutoCAD. AutoCAD can also interact with AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D and AutoCAD R14.R services by using XML in the form of an API definition document. These can be downloaded from the AutoCAD Exchange site. AutoCAD can also interact with the AutoCAD eDrawings COM library (ADDLib) to automate the application.
