KeyMacro is a small app for iOS that's pretty handy. KeyMacro lets you create scripts for quick use of common services, like messaging, calling, navigation, reminders, etc. The app currently supports 21 services (though this number is continuously growing), including texts, phone calls, iMessages, Facebook, Twitter, WhatsApp, Maps, and so on. KeyMacro is a great tool, especially if you're a journalist, freelancer, or someone who needs to create multiple scripts on the go. It's not perfect, however, as it's not available in some markets and it's a little complex to use. One thing KeyMacro excels at is creating and managing multiple scripts at once, for instance you can have one for navigation and another for texts. You can also switch between them by tapping on the top-left menu. Another cool feature is a custom keyboard. You can add shortcuts, change them, and even assign them to a different function. The app is free, however you can buy an In-App-Purchase to get rid of ads. iCloud Keyboard Replacement for iOS is a small app that brings a very interesting feature to iPad users. It is a keyboard replacement that lets you use the traditional keyboard on your device, and use the primary home screen as a virtual keyboard. The installation process is a bit more involved, but once you get it, the app will automatically appear on your home screen. This app really comes in handy, especially for those who use iOS as their main operating system, as it works perfectly with the iPad's native operating system. However, it also has a dedicated home screen where you can pin the app to the home screen for quick access. Keyboard Replacement for iOS is free, and requires iOS 8.0 or later. It is compatible with iPhone and iPad. Instapaper Description: Instapaper is a web service that offers the ability to save web pages and read them later, whenever you want to. While it might sound pretty cool, Instapaper is not just a bookmarklet. It's much more. It gives you the ability to save articles, videos, and other content for reading offline. If you like the idea of saving interesting articles on your iPad for later, but don't have time to read them, then Instapaper might be just the tool for you. And in case you're
